0.6.2

Contents

1.	Electrical Circuit	1
2.	Ohm's Law	7
3.	Voltage Error Circuit and Current Error Circuit.	11
4.	Electrical Resistors.	13
4.1	Introduction	13
4.2	Linear Resistor	15
4.3	NTC Resistor (Thermistor).	17
4.4	PTC Resistor	19
4.5	Varistor (VDR)	21
4.6	Light-dependent Resistor (LDR).	23
4.7	Series Circuiting of Resistors	25
4.8	Parallel Circuiting of Resistors	27
4.9	Mixed Series and Parallel Circuiting	29
4.10	Unloaded Voltage Divider	31
4.11	Loaded Voltage Divider	33
5.	Equivalent Voltage Source	35
6.	Series Circuiting of Voltage Sources	39
7.	Parallel Circuiting of Voltage Sources	41
8.	Electrical Power and Work	43
9.	Efficiency of Electrical Power	47
10.	Voltage, Current and Power Matching.	49

Solutions

1.	Electrical Circuit	S 1
2.	Ohm's Law	S 2
3.	Current Error Circuit and Voltage Error Circuit.	S 4
4.	Electrical Resistors	S 5
5.	Equivalent Voltage Source	S 16
6.	Series Circuiting of Voltage Sources	S 17
7.	Parallel Circuiting of Voltage Sources	S 18
8.	Electrical Power and Work	S 19
9.	Efficiency of Electrical Power	S 22
10.	Voltage, Current and Power Matching.	S 23

Appendix

Abbreviations and Symbols	A 1
Components List	A 2
Technical Data of the Measuring Instruments Required for the Experiments in the Manual	A 2

0.6.2

List of Contents

1.	Establishing and Displaying Characteristics in AC Technology	1
1.1	Introduction	1
1.2	Characteristics of the Sine-Wave Voltage	1
1.3	Active Power with Sine-Wave Voltage	5
1.4	Characteristics of Square-Wave AC Voltage	9
2.	Three-Phase Alternating Current	13
2.1	Introduction	13
2.2	Potential Gradient in Three-Phase Current Systems	15
2.3	Loads in Star Circuit	19
2.4	Loads in Delta Circuit	23
2.5	Measurements on a Defective Star Circuit	27
2.6	Measurements on a Defective Delta Circuit	31
3.	Capacitor in the AC Circuit	35
3.1	Introduction	35
3.2	Charging and Discharging Process of a Capacitor	37
3.3	Phase Shift between Current and Voltage on the Capacitor	41
3.4	Capacitive Reactance of a Capacitor	43
3.5	Series Circuiting of Capacitors	45
3.6	Parallel Circuiting of Capacitors	47
3.7	Reactive Power of a Capacitor	49
4.	Coil in the AC Circuit	53
4.1	Introduction	53
4.2	Switch-On and Switch-Off Process of a Coil	55
4.3	Phase Shift between Current and Voltage on a Coil	59
4.4	Inductive Reactance of a Coil	61
4.5	Series Circuiting of Coils	63
4.6	Parallel Circuiting of Coils	65
4.7	Reactive Power of a Coil	67

5.	Interconnecting Resistor, Capacitor and Coil	71
5.1	Introduction	71
5.2	Series Circuiting of Resistor and Capacitor	71
5.3	Parallel Circuiting of Resistor and Capacitor	75
5.4	Series Circuiting of Resistor and Coil	79
5.5	Parallel Circuiting of Resistor and Coil	83
5.6	Series Circuiting of Capacitor and Coil	87
5.7	Parallel Circuiting of Capacitor and Coil	91
5.8	Series Circuiting of Resistor, Capacitor and Coil	95
5.9	Parallel Circuiting of Resistor, Capacitor and Coil	99
5.10	Active, Reactive and Apparent Power	103
6.	Transformers	107
6.1	Introduction	107
6.2	Coupling Factor	107
6.3	Transformation Ratio	109
6.4	Resistance Transformation	111

Solutions

1.	Establishing and Displaying Characteristics in AC Technology	S 1
2.	Three-Phase Alternating Current	S 5
3.	Capacitor in the AC Circuit	S 11
4.	Coil in the AC Circuit	S 19
5.	Interconnecting Resistor, Capacitor and Coil	S 25
6.	Transformers	S 35

Appendix

List of Abbreviations	A 1
List of Plug-In Components	A 3
Technical Data of Measuring Equipment and Power Supplies in the Manual	A 3

0.6.2

List of Contents

1.	Rectifier Diodes	1
1.1	Effect of the p-n junction in diodes	1
1.2	Representation of characteristics of diodes of different semiconductor materials	3
1.3	Half-wave rectifier circuit M1	5
1.4	Bridge rectifier circuit B2	8
2.	Zener Diodes	11
2.1	On-state and off-state characteristics of Zener diodes	11
2.2	DC voltage-limiting with Zener diodes	13
2.3	Series and series-opposed circuit of Zener diodes	19
2.4	AC voltage limitation and overvoltage protection with Zener diodes	21
2.5	Voltage stabilization with Zener diodes	25
3.	Diodes with Special Properties	27
3.1	LEDs	27
4.	Bipolar Transistors	31
4.1	Testing the layers and the rectifying behaviour of bipolar transistors	31
4.2	Current distribution in the transistor and control effect of the base current	35
4.3	Characteristics of the transistor	39
4.4	Influence of the load resistance on the transistor properties	44
5.	Unipolar Transistors (Junction Field-Effect Transistors)	49
5.1	Testing the layers and the rectifying behaviour of FETs	49
5.2	On-state characteristic of the gate p-n junctions for FETs	51

5.3	Control effect of the gate with n-channel FETs	53
5.4	Output characteristic of the FET	56
6.	MOSFET (IGFET).	63
6.1	Control effect of the gate in the self-inhibiting	63
6.2	Output characteristics of the self-inhibiting	67
7.	Unijunction Transistors (UJT).	73
7.1	Testing the line in the unijunction transistor.	73
7.2	Switching characteristics of the unijunction transistor	75
7.3	Control characteristics of the unijunction transistor	78
8.	Thyristors	81
8.1	Diode thyristors (DIAC)	81
8.2	Triode thyristors (thyristor).	85
8.3	Bidirectional (TRIAC)	90
Solutions.	S 1 ... S 56
Appendix.	A 1
Abbreviations and symbols		A 1
List of plug-in components		A 3
Voltage supply requirements and measuring instruments		A 5

0.3.1

List of Contents

1.	Amplifier Circuits	1
1.1	Basic amplifier circuits with bipolar transistors	1
1.2	Basic amplifier circuits with field-effect transistors (FET)	6
1.3	Multistage amplifiers	11
1.3.1	Dual-stage AC voltage amplifier	11
1.3.2	Darlington amplifier	15
1.3.3	Emitter-coupled amplifier	18
1.3.4	Phase inverters	21
1.3.5	Differential amplifier	25
1.3.6	Dual-stage DC voltage amplifier with complementary transistors	29
1.4	Push-pull output amplifier	33
1.5	Feedback	37
1.5.1	Negative feedback	37
1.5.2	Positive feedback	43
2.	Trigger Circuits	47
2.1	Square-wave generators	48
2.1.1	Threshold value switch (Schmitt trigger)	48
2.1.2	Astable trigger circuit (multivibrator)	52
2.1.3	Monostable trigger circuit	54
2.1.4	Bistable trigger circuit (flipflop)	56
2.2	Sawtooth generator (pulse generator)	59
2.3	Sine wave generators	61
2.3.1	Sine wave generator with RC element	61
2.3.2	Sine wave generator with LC element	63

3.	Modulators and Demodulators	65
3.1	Amplitude modulator and demodulator	65
3.2	Frequency modulator	70
4.	Power Supply Circuits	73
4.1	Rectifier circuits	73
4.1.1	Half-wave rectifier circuit M1	73
4.1.2	Bridge rectifier circuit B2	76
4.1.3	Three-phase current rectifier	78
4.1.4	Voltage multipliers	82
4.2	Stabilizing circuits	86
4.2.1	Voltage controller (linear)	86
4.2.2	Current controller	88
4.2.3	Switched power supplies	91
4.3	DC voltage converter	94
5.	Power Electronics Circuits	97
5.1	Phase angle control with thyristor	97
5.1.1	Phase angle control with rectifier effect	97
5.1.2	Phase angle control without rectifier effect	101
5.2	Phase angle control with TRIAC	105
5.3	Full-wave control with no-voltage switch	108
5.4	DC voltage switch with thyristors	112

6.	Binary Switching Elements	115
6.1	AND element	116
6.2	OR element	119
6.3	NOT element	122
6.4	NAND element	124
6.5	NOR element	127
7.	Operational Amplifiers	131
7.1	Operational amplifier as inverting amplifier	131
7.2	Operational amplifier as non-inverting amplifier	135
7.3	Operational amplifier as summing amplifier	138
7.4	Operational amplifier as differential amplifier	143
7.5	Dynamic behaviour of the operational amplifier	147
	Solutions	S 1 ... S 71
	Appendix	A 1
	List of abbreviations and symbols	A 1
	List of plug-in components	A 3
	Required voltage supplies and measuring instruments	A 5
	Foil	
	Front view of the ELECTRONIC BOARD (Type 1018)	F 1
